Rock types encountered

(a) Granite

(b) Intrusives

(c) Sediments

(d) Volcanics

(e) Mineralization

GENERAL COMMENTS:

Came to Mt. Fregeald April 9th Enterprise people had
plowed the road busted the Jeep 4 wheel drive after getting
here worked on it for two days finally was able to use it fine
well drive last my shaft from last fall wanted to drift
from bottom of it but it was full of ice to the top.

Digging for four days on new prospect had to use fire shovels
Drove jeep to Carnaby & Whitehorse for repair at Mt
8000 took more than 2 weeks getting parts, cost total \$?

(b) Intrusives

(c) Sediments

(d) Volcanics

(e) Mineralization

GENERAL COMMENTS:

Monday 16. Digging on tin using fire for thawing very hot weather

Tuesday 17. " " " " very windy & a little rain

Wed. 18. " " " " Helicopter airclet over cabin

Thursday 19. " " " " & went to Larnacks, Fritzly in road

Friday 20. " " " " S

Monday 23. " " " " Came back Thunder storm heavy hail

Tuesday 24. Prospecting on south-east end of Sargent Ridge ^{evening}

Wed. 25. " " " " Emmons Hill found mineral in

place, rock type Emmons will require a bulldozer
it. Emmons Hill between Tinto Hill & Mt. Frey

Sketch Map of Area Covered, or Additional Comments.

~~Thurs~~ Sat. 26. Made a gate for groundsluicing
heavy smoke all around for several days. Wind from
north for some days 14" ice for 2 mornings in my
rain gage

Frid. 27. Prospecting 15 miles east of here dug holes
2 feet deep. Rock type Volcanics & Gneis suspect some Mineral

Sat. 28. Dug hole near cabin in case fire gets here
to put my things in may have to take off in a hurry.

Helicopter landed at cabin with 3 men first time this
was done, dangerous landing. Very smoke, Ice in Rain
Gage in morning

Sund. 29. Prospecting 15 miles from here using
fire in hole. Rocks amictaloidel Volcanics very
much oxidized, shows mineralization

Mon. 30. Washing & Cooking. Examining Rocks

Tues. July 1. Prospecting 15 miles from here started
hole #2. made a ladder using fire in holes that
very cloudy some rain, smoke clearing some

2. Digging on hole #2. Thunder some rain. Got flat tire
one piece of rock looks like finely divided ~~tin~~ tin
Digging some place, went to barnack in evening,
to Whitehorse while in barnack

(c) Sediments

(d) Volcanics

(e) Mineralization

GENERAL COMMENTS:

Tuesd. 23. Sept. 69. Digging at 36 Mile on Freygold Road. Intrusive rocks at contact with Gneiss at several places between 35 Mile and 36 Mile overburden deep would require a great deal more digging a little mineralization here & there.

Helicopter from Canadian Creek landed in v. where I was digging.

Wed 24. Digging at 36 Mile

Sketch Map of Area Covered, or Additional Comments.

Thursd. 25. Went on Mt. Freegold for Skelbarott and
spare tools.

Frid. 26. Digging at 36 Mile not satisfactory some
day if I have my own Bulldozer would dig there some
more

Sat. 27. Digging on old Placer Channel below Foster
Creek on Bench of Layonore Creek

Sund. 28. Digging on old Placer Channel got Bedrock
on rim 30 or 40 feet above present creek some scales

Mon. 29. Digging same place 7 feet deep 3 feet of
broken bedrock appears to be high rim with bedrock
slipping away from present creek.

Tuesd. 30. Digging on new hole about 100 feet further
down stream on Bench. South wind warm.

Wed. 1. Oct. 69. Raining. Digging in afternoon
Big Boulders a problem. Staked Placer claim

'2. Went on Mt. Freegold with Pen. Granger
him around some of my old Diggins on
group of claims there.
