DOCUMENT NO: 0928642
MINING DISTRICT: WATSON LAKE
TYPE OF WORK: Soil Sampling

REPORT FILED UNDER: Wm. Shenfield

DATE PERFORMED: June 17 to June 22, 1987

DATE FILED: April 5, 1988

LOCATION: LAT.: 61°33'N

AREA: Ross River

LONG.: 131°33'W

VALUE \$: 1823.13

CLAIM NAME & NO.: SARAH 1-2

WORK DONE BY: Wm. Shenfield

WORK DONE FOR: Wm. Shenfield

DATE TO GOOD STANDING:

REMARKS: Eighteen soil and three rock samples were collected from the Sarah property while exploring for zinc mineralization. Minor sphalerite lenses occur within thin limestone member in outcrop but is probably not the source of float found in the area. The float is thought to come from a recessive weathering zone beneath the limestone.

Dear Patti,

Please change the report number on Wm. Shenfield's soil and rock analysis assessment report from 092860 to 092862. I hope this change does not cause you too much trouble. I appologize for the inconvenience.

Sincerely,

ASSESSMENT WORK 1987

SARAH 1,2.

OWNER - WM. SHENFIELD.

MINING DISTRICT; WATSON LAKE.

CLAIM SHEET; 105G/12

LOCATION; 40 miles South-east of Ross river(61 33'N-131 33'W.)

OUTLINE OF WORK; (JUNE 17 To JUNE 22)

Work was directed at occurrences of good grade sphalerite float(carbonate gangue) which does not appear to have generated any interest during previous exploration.

Minor sphalerite lenses in a thin lmst. member outcrop but are not believed to be the source of the higher grade float which is most abundant in a recessive weathering zone beneath the lmst.

A base line was cut along the projected strike of this zone for 3400 feet to facilitate geochem. sampling which it was hoped would confirm the occurrence of mineralization in this zone. However, frozen ground prevented the sampling of any but the A horizon which is not considered a good indicator in this area. Some sampling was carried out(B)along road cuts where frozen ground was not a problem.

General reconnaissance of the area for outcrop, in the vicinity of projected strike turned up several outcrops of lmst and green schists but the general lack of sedimentary features did little for structural interpretation.

A heliport was constructed near DDH D1 to facilitate work later in the summer but we were unable to return during 87.

Two men were engaged, Wm. Shenfield and Robt. Shenfield, in this work during the period June 17 to June 22, 1987.

Transportation into the property was provided by John Witham of Trans Turbo, Ross river, as winter road was found impassable.

See enclosed Plan.

Wm. Shenfield
