

GEOCHEMICAL REPORT

LOU CLAIMS 1-8

Whitehorse Mining District
N.T.S. 105 K-2
Latitude 62° 08'
Longitude 132° 58'

by

ALLEN CARLOS

for

Art John Sr. Mining Ventures Ltd.
P.O. Box 51, Ross River, Yukon, Y0B 1S0

Sampling performed in August 1996.

093547

This report has been examined by
the Geological Evaluation Unit
under Section 53 (4) Yukon Quartz
Mining Act and is allowed as
representative work in the amount
of \$ 800.

M. Baker

INTRODUCTION

Arthur John Sr. of Ross River approached me early in the year for some help to assess the LOU 1-8 claims. We agreed that he would sample the area of interest and I in turn would cover the cost of assaying.

PROPERTY, LOCATION (Fig. 1)

The LOU 1-8 claims are located along the Pelly River, approximately 25 km. upstream from Faro.

ROCK GEOCHEMISTRY

A visit to the property in late September determined that Art had sampled the base of a gossanous exposure, trending for approximately 14 metres along the river edge. Sample taking was systematic at approximately .6 m. intervals.

GEOLOGY

Mapping by S.D. Gordey (1987) determined that the exposed quartzites belong to the Nisutlin Allochthonous Assemblage, a part of Yukon Tanana - terrane.

INTERPRETATION

Though Au values are generally low, values for some of the indicator elements suggest further work be done.

FIG. 1

SCALE 1:30,000

N.T.S. 105K-2

CONCLUSIONS & RECOMMENDATIONS

Initial rock sampling results are encouraging for the possibilities of significant Au deposition. Further sampling should be done by first blasting down several feet to hopefully get beyond any surface leaching.
