REPORT

BLACK FOX 1-38 CLAIMS

YC30519 - YC30528
YC35176 - YC35203

NTS # 115 O \ 3

LAT: 63° 03 N

LONG: 139° 05 W

DAWSON MINING DISTRICT

AUTHOR OF REPORT SHAWN RYAN

WORK PERFORMED SEPTEMBER 30 to OCTOBER 06, 2005

DATE OF REPORT APRIL 02, 2006

TABLE OF CONTENT

1.0 SUMMARY

The Black Fox project had a crew of six men work the claim block. The crew consists of Jim Skailes, Tyson Foxcroft, Issac Fage, Kyle MacDougall, Scott Fleming and Shawn Ryan. The exploration program was successful in extending the 2004 gold soil anomaly and uncovered for 25 feet a new quartz vein that average 50-80 centimeters wide with values of 7-10 g/t gold.

2.0 INTRODUCTION

The Black Fox project had 22.7 Kl of grid work established with 22.7 Kl of magnetic survey conducted. A total of 717 soil where collected on 25 meters soil spacing. Trenching was conducted and uncovered a new quartz vein. More prospecting around the quartz vein revealed the vein is running in float over a length of 185 meters. We staked an additional 10 units to cover the ground between the Black Fox new showing and the Kit Claims.

3.0 LOCATION

The Black Fox project is located at the headwaters of Thistle Creek; it's in Dawson Mining Division, on NTS # 115 0/3. The latitude 63°03'N and longitude 139°05'W.

4.0 ACCESS

The Black Fox claim group can be reached via helicopter from Dawson City or one can boat 100 miles up the Yukon River then take a four wheeler 25 kilometers up the Kirkman Creek road system to the headwaters of Kirkman and Thistle Creek.

5.0 REGIONAL AND PROPERTY GEOLOGY

5.1 REGIONAL GEOLOGY

Regional Geology GSC Description

Regional Geology

The Regional Soil Program covered six different rock units according to the new GSC geology map called the Southern Stewart River Area, Open File # 4641 by Jim Ryan and Steve Gordey.
Jurassic? Or Cretaceous

Unit 16
Granite: pink to grey, locally porphyritic, syenogranite to monzogranite plutons and dykes.

Mid? To Late Paleozoic

Orthogneissic Rocks

Unit 9
Comprise of Grey Gneiss: intermediate to mafic orthogneiss; generally grey; banded to layered; commonly veined; derived from intermediate granitoid (tonalite to diorite) sheets; usually interlayered with amphibolite schist and gneiss.

Unit 6 / 9
Comprise of undivided amphibolite and grey gneiss units.

Unit 10
Comprise of Felsic Gneiss: pink to orange felsic orthogneiss; banded to layered; veined and/or segregated; derived from felsic granitoid sheets

Metavolcanic? Volcaniclastic? Rocks

Unit 6
Comprise of an Amphibolite schist and gneiss; metabasite; possibly derived from mafic to intermediate volcanic or Volcaniclastic rocks.

Metasedimentary Rocks

Unit 3 /4

Comprise of a Quartz-Mica schist and Mica-Quartz schist.

5.2 PROPERTY GEOLOGY

I did not have much time to evaluate the geology but I did bring Mike Burky and Chris Ash visited the property during the 2004 field season. Chris Ash noted meta gabro, ultra mafic and mafic volcanic. All are good potential host for mesothermal gold quartz vein.

6.0 WORK PERFORMED / METHODS

6.1 Grid Work

A total of 22.7 kilometers of grid was established using Garmin GPS 76 instruments. The beauty of Garmin 76 GPS are that they have a left right function and can keep you right on track within a ± 5 meters error. Station where flagged using Artic orange flagging tape and marked with black permanent markers as to the line and station co-ordinates. In total 908 station where established. The grid lines ran in a northeast direction with the intension to cross the quartz vein float and the 2004 gold soil anomaly at a 90-degree angle.

6.2 Magnetic Survey

The magnetic survey was conducted across the entire grid. The survey uses two Envi-Mag, Scintrex magnetometers. One is the portable field unit and the second is a base station magnetometer that records reading every 10 seconds at a stationary position for the entire survey. The base station monitors the earth daily magnetic drift. At the end of each daily survey both the field and base station magnetometers are plugged in together and the daily drift is corrected out of the field mag.

Only the corrected data is used to plot the survey results. The field survey took reading every 12.5 meters for a total of 1816 readings.

6.3 Soil Survey

The Black Fox Project had 20 man days of soil work collecting 717 soils.

All soil sample where taken with one meter soil probes and sometime with a prospector pick. We carried both on rocky talus slope. Soil sample location where marked on the ground with orange flagging and recorded in Garmin GPS. About 400-500 grams of soil was collected and place in well mark kraft soil bags.

All sample where brought out to Dawson and air dried repacked in rice bags and sent to Acme Labs in Vancouver. Sample where process with Aqua Regia ICP-MS for 36 elements.

.

The GPS where downloaded every night and store in a personal computer.

6.4 Trenching

The Black Fox project had 5 man days of hoe work. The hoe work was done with a Can Dig mini excavator. The excavator was mobilized up the Yukon River via river boat in two pieces then put together and transported by four wheeler up the Kirkman Creek road to the work site. Trenching was successful in uncovering 15 meters of quartz vein.

7.0 INTERPRETATION

7.1 Magnetic Survey

The magnetic survey was very helpful in delineating a regional structure pattern. From what we see is that the magnetic high is sitting over mapped Amphibolite and that the magnetic highs are trending on a general east west trend. A magnetic low trends right threw the middle of the grid on a north south trend. This distinct kind of magnetic low on a north south trend has being seen in other location in the district and they turn out to be felsic dikes.

7.2 Soil Survey

The soil survey was very useful in demonstrating a nice gold, mercury and copper anomaly. The gold anomaly indicates that there should be more gold bearing rocks found east of the high grade quartz vein. The anomalous gold quartz vein found in the trench also has mercury and copper associated with it. Using these elements from the soil survey one can see how the anomalies values are moving in an easterly pattern. All being equal more work is needed in this direction.

7.3 Trenching

The trench work uncovered a 50-80 cm wide quartz vein that moving in an east southeast direction. The hoe work help uncover about 10-15 meters of quartz vein. The vein had 2-3 % sulfides of copper and a dark material potentially lead or antimony. Quartz vein material was also found 160 meter on trend to the west northwest. The trench measure 25 feet long by 7 feet wide and was dug to a depth of 6 feet.

8.0 RECOMMENDATION

I would recommend more trenching on the quartz vein and extending the soil grid towards the Kit claims to the south and extending the soil and magnetic survey to the east.

10.0 COST

Grid Work 20 KL @ $150.00 per KL		$3,000.00
Magnetic Survey 20 KL @ $250.00 per KL		$5,000.00
Wage 20 man days @ $250.00 per day		$5,000.00
Food Allowance 20 man days @ $25.00		$500.00
Assay Cost 717 soil @ $17.00 per sample		$12,189.00
Transportation Cost, boat and four wheeler		$2,000.00
Report writing		$300.00
	Total	$27,989.00

11.0 QUALIFICATION

I Shawn Ryan located in Dawson City, Yukon work as a professional prospector. I run a small exploration company located in Dawson City.

I have worked in the exploration business for the last 22 years. I worked the first 12 years as a contractor working on numerous projects in the NWT, Ontario, Quebec and the Yukon. I have worked the last 8 years as a local prospector for myself.

I have being trained to run various geophysical instruments and surveys such as magnetic surveys, max-min surveys, induce polarity surveys and VLF surveys.

I have overseen the entire Black Fox Project and was party chief in charge.

I own 100% of the Black Fox claims.

Dated this 02 of April 2005 in Dawson City, Yukon.

Respectfully submitted

Shawn Ryan

Standard is STANDARD DS6.

GROUP 1DX - 15.0 GM SAMPLE LEACHED WITH 90 ML 2-2-2 HCL-HNO3-H2O AT 95 DEG. C FOR ONE HOUR, DILUTED TO 300 ML, ANALYSED BY ICP-MS.

(>) CONCENTRATION EXCEEDS UPPER LIMITS. SOME MINERALS MAY BE PARTIALLY ATTACKED. REFRACTORY AND GRAPHITIC SAMPLES CAN LIMIT AU SOLUBILITY.

- SAMPLE TYPE: SOIL SS80 60C Samples beginning 'RE' are Reruns and 'RRE' are Reject Reruns.

Data A FA ____ **DATE RECEIVED:** OCT 7 2005 **DATE REPORT MAILED:** Jan 10/06
