GEOCHEMICAL REPORT

ON THE BEAR 1 - 56 CLAIMS

WHITEHORSE MINING DISTRICT, YUKON TERRITORY

INTRODUCTION

The BEAR claims were staked in April and May, 1981 near the headwaters of Red Mountain Creek to cover a possible southerly extension of the Red Mountain porphyry molybdenum deposit.

The area is underlain by slates, schists, and quartzites of the Big Salmon Complex of Precambrian to Mississippian age and related gneisses. Quartz-feldspar porphyry stocks of late Cretaceous to Tertiary age intrude the area.

The work described in this report was done between August 24 and September 3, 1981.

Personnel employed during this program were:

<u>Name</u>	<u>Period</u>	<u>Address</u>
A.S. Denton	July 28 - August 3/81 (July 29/81)	407, 630 - 8th Avenue S.W. Calgary, Alberta T2P 1G6
E.A. Nelson	August 15 - August 31/81	206, 15 Teslin Road Whitehorse, Yukon Y1A 3M2
E. Nelson	August 24 - Sept. 3/81	206, 15 Teslin Road Whitehorse, Yukon Y1A 3M2
D. Fraser	August 24 - Sept. 3/81	206, 15 Teslin Road Whitehorse, Yukon Y1A 3M2

LOCATION AND ACCESS

The BEAR claims are located in the Sawtooth Range just northeast of the Teslin River, 75 km east-northeast of Whitehorse (see Plate 1a). The claims are located in mountainous terrain around tree-line between elevations of 1200 and 1700 m. Access is by helicopter based in Whitehorse.

GEOLOGY AND MINERALIZATION

The claims are located near the eastern edge of the Whitehorse Trough. The area is underlain by rocks of the Big Salmon Complex and by more recent intrusives. In this area the Complex consists of slates, schists, and quartzites of Precambrian to Mississippian age. The intrusives are quartz-feldspar porphyry stocks of late Cretaceous to Tertiary age.

No mineralization has been located on the property. Potential exists for a southerly extension of the Red Mountain porphyry molybdenum deposit or for a separate mineralized system.

GEOCHEMISTRY

Sample Collection

A total of 166 soil samples were collected at 100 m intervals along the 4200', 4500' and 5000' contours. The samples were taken at a depth of 10 - 20 cm from the "C" soil horizon where possible. Sample recovery was 96%.

A total of 25 stream silt samples were taken from creeks running through the property.

Sample Preparation

All soil and silt samples were dried and sieved to -80 mesh. Cu, Pb, Zn, and Mo analyses were performed by Atomic Absorption after digestion in acid. The analyses were conducted by Bondar-Clegg at their Whitehorse laboratory under the supervision of Mr. Steve Simpson.

Interpretation of Results

The results of the geochemical survey are plotted on Plate 2. Anomalous zinc values are restricted almost exclusively to the east side of the north-flowing Red Mountain Creek. This may be the result of a different lithology on the east side of the creek containing higher background levels of zinc. Anomalous molybdenum values are scattered and show no particular pattern. An area of anomalous copper values occurs in the southern part of the claim group. Further sampling would be necessary to determine the significance of this anomaly. Only a few point lead anomalies occur.

Anomalous silt samples appear to be restricted to the eastern part of the claim group and coincide with the zinc soil anomaly. No significant Cu, Pb, or Mo stream silt anomalies occur.

CONCLUSIONS AND RECOMMENDATIONS

This low density soil sampling program identified a copper anomaly along one soil contour line. An area of anomalous zinc values was also located. More detailed sampling and geological mapping in these two areas would better determine the significance of these anomalies.

Respectfully Submitted,
J.W. KERR & ASSOCIATES LTD.

AFFIDAVIT

I. A.S. Denton, of the City of Calgary, in the Province of Alberta,
Consulting Geologist, make oath and say:

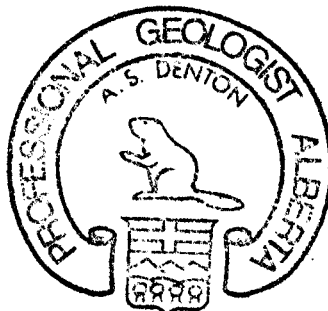

- 1) That I, through A.S. Denton & Associates Ltd., provide services as a Consulting Geologist for J.W. Kerr & Associates Ltd., and as such have a personal knowledge of the facts to which I hereinafter depose;
- 2) That annexed hereto and marked as "Appendix B" to this my affidavit is a true copy of my expenditures related to a geochemical survey carried out on mineral claims BEAR 1 - 56;
- 3) That the said expenditures were incurred at various times between the 28th day of July 1981 and the 25th day of March 1982, for the purpose of mineral exploration and filing of assessment reports on the above noted claim group.

Sworn before me at the City
of Calgary in the Province
of Alberta this _____ day
of _____, 1982.

A Notary Public In and For
The Province of Alberta.

APPENDIX C

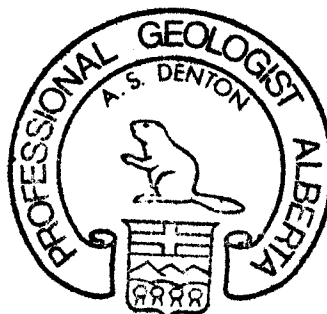

I, Alexander S. Denton, with business address at 407, 630 - 8th Avenue S.W., Calgary, Alberta, do hereby certify that I supervised the field work and have assessed and interpreted the data resulting from this geochemical survey on the BEAR 1 - 56 mineral claims.

I also certify

- 1) THAT I am a graduate of the University of Calgary, B.Sc. Geology (1978).
- 2) THAT I have engaged in mineral exploration in Canada since graduation.
- 3) THAT I am a Member of the Association of Professional Engineers, Geologists and Geophysicists of Alberta.

SUMMARY OF COSTS

BEAR & GRIZZLY CLAIM GROUPS

GEOCHEMISTRY SURVEY & GEOLOGICAL REPORT COSTS

WESTFORT PETROLEUMS LTD. ET AL

1. Bear Claim Group

Total of 56 claims for assessment work.

Bear #1 - 8 (YA 60161-168) - 19 May 1982
Bear #17 - 32 (YA 60169-176) - 19 May 1982
Bear #41 - 56 (YA 60185-200) - 25 May 1982
Bear #9 - 16 (YA 60274-281) - 5 June 1982
Bear #33 - 40 (YA 61255-262) - 10 June 1982

Grizzly Claim Group

Total of 28 claims for assessment work.

Grizzly #33 - 44 (YA 60121-132) - 19 May 1982
Grizzly #65 - 72 (YA 61263-270) - 10 June 1982
Grizzly #73 - 80 (YA 73846-853) - 8 Sept 1982

2. Assessment Work Expenditures

The following is a break-down of costs expended on the Bear & Grizzly claim groups for the purpose of assessment work requirements.

Disbursement Costs

	<u>(56) Bear</u>	<u>(28) Grizzly</u>

SUMMARY OF WORK DONE

1. Preparation of assessment reports for Bighorn, Caribou, Dall, Bear and Grizzly claim groups to meet requirements of the Yukon Quartz mining act.
2. Completion of maps for each of the above reports and interpretation of results of geochemical surveys.
3. Presentation of information to Jed Dagenais of Aurum Mines Ltd. and representatives of Westfort's Joint Venture partners at the meeting of March 2.
4. Monitoring of claim tenure status with respect to claim transfers.
5. Discussions with Bob Hilker, geologist for Aurum Mines Ltd. subsequent to March 2 meeting.
