MINING DISTRICT: WATSON LAKE
TYPE OF WORK: Trenching

REPORT FILED UNDER: YUKON MINERALS CORPORATION

DATE PERFORMED: JUNE 10-30, 1990

DATE FILED: JAN 14, 1991

LOCATION: LAT.: 61°38'N

AREA: GROUNDHOG CREEK

LONG.: 132°50'W

VALUE \$: 9,300

CLAIM NAME & NO.: MPR 110, 131, 133
VER 1, 3, 5
IIV 18, 20, 95, 96, 98, 266, 268, 270, 272

WORK DONE BY: GRAHAM DAVIDSON

WORK DONE FOR: YUKON MINERALS CORPORATION

DATE TO GOOD STANDING:

REMARKS: Trenching on the IIV property was successful in 1990. The areas worked on were; No. 2 Zone, No. 3 Zone, Otter Zone and the STRAT Zone. The first two are vein structures, the third is a carb. breccia and the fourth is a quartz-carbonate horizon averaging 2 m in width which has been traced for more than 200 meters. The zone assays up to 18 g/t Ag, 7.5% Zn and 2.76% Pb from grab samples.

SUMMARY OF 1990 TRENCHING PROGRAM ON THE KETZA PROJECT

Trenching was performed on the No.2, No.3, Groundhog, Otter and Strat zones between June 10 and June 30, 1990. The program was supervised by T. McCrory of McCrory Holdings Ltd., assisted by R. Anchikowski. G. Davidson provided geological services. Ampex Mining Ltd. of Whitehorse supplied a D7E bulldozer with ripper, operated by J. Martensson. The existing camp at kilometre 9 on the Groundhog Creek road was utilized for accommodation.

The trenching program was targeted at both existing mineralization; Groundhog, No.2 and No.3 zones and at newly discovered showings; Otter and Strat zones. Four thousand seven hundred and thirty (4,730) cubic metres of material was removed from eleven trenches during the 1990 program. Access to several of the trenches required road building or upgrading of existing roads.

All the trenches were mapped and sampled (43 samples). Northern Analytical Laboratories performed geochemical analyses for Au-Ag-Pb-Zn-Cu-Cd, followed by assay of above limit values.

The results of the program are:

1. The No.2 zone was exposed in two trenches northeast of earlier trenching. Chip samples along the wall of TR 90-B, over 5.66 m assayed 13.5g/t Ag, 2.0% Zn and .45% Pb. A 3.25 m chip across the floor of TR 90-B assayed 41.6 g/t Ag, 2.13% Pb and 3.97% Zn.
2. The No.3 zone was exposed in a trench 200 m to the northeast of the main trench. Continuous chip samples over 10.6 m assayed 47.9 g/t Ag, 2.2% Zn and 1.7% Pb.

3. In the Otter zone galena bearing dolostone breccia was uncovered in TR 90-G. A 1.5 m chip sample assayed 95 g/t Ag, 16.5% Pb. and 0.99% Zn.

4. Strataform mineralization (Strat zone) was discovered at the south end of the property. A quartz-carbonate horizon averaging 2 m in width was traced over a 200 m strike length. The highly deformed horizon contains bands of sphalerite, galena, pyrite and pyrrhotite. Grab samples assayed up to 18 g/t Ag, 7.5% Zn and 2.76% Pb.

Exploration programs have been proposed for the No.2 and No.3 zones by underground drilling and for continued surface exploration, B. Fowler, P. Geol. (see Report on 1988 Exploration Program Ketza Project). The writer concurs with Mr. Fowler's recommendations.

G.S. Davidson, P. Geol.

A handwritten signature in cursive script, appearing to read "G. Davidson".

| Sample Number | Sample Type | Location | Description | Au ppb | Ag ppm | Pb ppm | Zn ppm |
|---------------|-------------|------------------------|---|--------|--------|--------|--------|
| 90-1 | Grab | Otter Zone Trench | Quartz vein (30 cm wide), euhedral sphalerite, pyrrhotite, minor galena tetrahedrite | 138 | 4.7 | 115 | 2450 |
| 90-2 | Grab | Otter Zone Trench | Quartz vein, minor galena, vugs and oxide | 212 | 15.9 | 3490 | 931 |
| 90-3 | Grab | Strat Zone | Quartz sericite schist, quartz-sulphide bands, mainly pyrite and pyrrhotite, less sphalerite and galena | 21 | 1.4 | 1210 | 4110 |
| 90-5 | 1.75m chip | Delta Zone Trench 90-A | Red weathering dolostone, fractured, galena-sphalerite-goethite in fractures | 71 | 13.1 | 5020 | 1.8% |
