Mining Recorder
Room 102,
300 Main Street,
Whitehorse, Yukon
Y1A 2B5

March 12, 1997

Dear Mrs. Southwick,

This letter is a brief overview of the drilling program that Cra-Mar Mining Inc. under took back in November 1997.

Don MacGregor was in charge of the drilling program. Along with Peter Hildebrand, they started a drilling package that would end up having 34 holes drilled.

Don started on the project on November 12, 1997 and was finished and December 9, 1997.

The equipment used was as follows:

- F250 four wheel drive (diesel)
- 3500 GMC (gas)
- Trailer mounted hydraulic drill w/ 18' mast capable of 120' + depth (provide by Vince Young)
- 4.5" bulldog cutter head bit with 8 carbide insert bits
- hex core 4.5" auger pipe in 5' lengths

We chose to drill it with the dry auger drill because of the weather and the samples brought up hole with the bit.

All samples were recovered and bagged with the hole number and depth recorded. A portion of each sample was taken and washed. There was no visible signs of either Gold or Silver. As a result we did not send any sample in to be assayed. We do think the ore body is longer than we had originally thought because of our drilling on claim #13. The other holes helped us to put an exploration program together for later this year.

I hope the information in this package is satisfactory. If you have any questions please feel free to contact me at the above address or phone number.

Thank you.

Sincerely,

Dan MacGregor
President
Per: Cra-Mar Mining Inc.
