1.0 SUMMARY

The Black Fox project had a crew of six men work the claim block. The crew consists of Jim Skailes, Jeremy Duplisea, Kyle MacDougall, Matthew McHugh, Joe McCann and Shawn Ryan. The exploration program was successful in extending the 2005 gold soil anomaly and uncovered for 15 feet a new quartz vein that average 50-80 centimeters wide with values of 3 g/t gold 90 meter on strike from the 2005 trench.

2.0 INTRODUCTION

The Black Fox project had 26. Kl of grid work established with 26. Kl of magnetic survey conducted. A total of 527 soil where collected on 50 meters soil spacing. Trenching was conducted and uncovered a quartz vein 90 meter on strike with the 2005 trench.

3.0 LOCATION

The Black Fox project is located at the headwaters of Thistle Creek; it's in Dawson Mining Division, on NTS # 115 0/3. The latitude 63°03'N and longitude 139°05'W.

4.0 ACCESS

The Black Fox claim group can be reached via helicopter from Dawson City or one can boat 100 miles up the Yukon River then take a four wheeler 25 miles up the Kirkman Creek or Thistle creek road system to the claim block which is at the headwaters of both creek systems.

5.0 REGIONAL AND PROPERTY GEOLOGY

5.1 REGIONAL GEOLOGY

Regional Geology GSC Description

Regional Geology

The Regional Soil Program covered six different rock units according to the new GSC geology map called the Southern Stewart River Area, Open File # 4641 by Jim Ryan and Steve Gordey.
Jurassic? Or Cretaceous

Unit 16
Granite: pink to grey, locally porphyritic, syenogranite to monzogranite plutons and dykes.

Mid? To Late Paleozoic

Orthogneissic Rocks

Unit 9
Comprise of Grey Gneiss: intermediate to mafic orthogneiss; generally grey; banded to layered; commonly veined; derived from intermediate granitoid (tonalite to diorite) sheets; usually interlayered with amphibolite schist and gneiss.

Unit 6 / 9
Comprise of undivided amphibolite and grey gneiss units.

Unit 10
Comprise of Felsic Gneiss: pink to orange felsic orthogneiss; banded to layered; veined and/or segregated; derived from felsic granitoid sheets

Metavolcanic? Volcaniclastic? Rocks

Unit 6
Comprise of an Amphibolite schist and gneiss; metabasite; possibly derived from mafic to intermediate volcanic or Volcaniclastic rocks.

Metasedimentary Rocks

Unit 3 /4

Comprise of a Quartz-Mica schist and Mica-Quartz schist.

5.2 PROPERTY GEOLOGY

The local property geology comprise of north east trending rocks units of Unit 6 , Amphibolites and mafic schist now describe as Thistle volcanic and unit ¾ which is describe as quartz mica schist.

6.0 WORK PERFORMED / METHODS

6.1 Grid Work

A total of 26 kilometers of grid was established using Garmin GPS 76 instruments. The beauty of Garmin 76 GPS is that they have a left right function and can keep you right on track within a ± 5 meters error. Station where flagged using Artic orange flagging tape and marked with black permanent markers as to the line and station co-ordinates. In total 1040 station where established. The grid lines ran in a northeast direction with the intension to cross the quartz vein float and the 2005 gold soil anomaly at a 90-degree angle.

6.2 Magnetic Survey

The magnetic survey was conducted across the entire grid. The survey uses two Envi-Mag, Scintrex magnetometers. One is the portable field unit and the second is a base station magnetometer that records reading every 10 seconds at a stationary position for the entire survey. The base station monitors the earth daily magnetic drift. At the end of each daily survey both the field and base station magnetometers are plugged in together and the daily drift is corrected out of the field mag.

Only the corrected data is used to plot the survey results. The field survey took reading every 12.5 meters for a total of 2080 readings.

6.3 Soil Survey

The Black Fox Project had 19 man days of soil work collecting 527 soils.

All soil sample where taken with one meter soil probes and sometime with a prospector pick. We carried both on rocky talus slope. Soil sample location where marked on the ground with orange flagging and recorded in Garmin GPS. About 400-500 grams of soil was collected and place in well mark kraft soil bags.

All samples where brought out to Dawson and air dried repacked in rice bags and sent to Acme Labs in Vancouver. Sample where process with Aqua Regia ICP-MS for 36 elements.

.

The GPS where downloaded every night and store in a personal computer.

6.4 Trenching

The Black Fox project had 2 man days of hoe work. The hoe work was done with a Can Dig mini excavator. The excavator was left on the work site from the 2005 trench work Trenching was successful in uncovering 5 meters of quartz vein material right on the road 90 meter on strike to the west from the 2005 trench.

7.0 INTERPRETATION

7.1 Magnetic Survey

The magnetic survey was very helpful in expanding the 2005 survey. I will discuss the new survey combine to the 2005 data.
The first thing we notice is that the magnetic survey has three different domain areas. Area A is a magnetic high associated with the anomalous gold soil pattern. Area A measure 3200 meters by 600 meters.
Area B is another magnetic high domain that lies east of Area A and is separated by what appears to be a north east trending fault.
The third domain is Area C and is located west of Area A. Area C is a defined by a magnetic low.

The magnetic survey also extended the regional north-west trending magnetic low structure that showed up on the 2005 survey. The NW trending major magnetic low continued off the edge grid in both NW and SE direction.

The 2006 survey also indicated major north-east trending structure. The structure shows up as magnetic low trends.
Another feature that showed up is the minor east south-east structural trends. Again these showed up as linear magnetic low features.

7.2 Soil Survey

The 2006 soil survey combined with the 2005 soil survey indicates three major gold soil anomalies. Anomaly A the largest of the three anomalies is situated in the center portion of the grid and measure 1150 meters by 900 meter. Anomaly B situated 150 meter north of Anomaly A measure 750 meters by 375 meters. The third gold Anomaly C is situated in the northern portion of the grid and measure 450 meters by 250 meters.
The two main gold Anomalies A and B both have anomalous geochemical indicator such as mercury, copper and lead. The third Anomaly C is distinct in that it does not have any other element association.

7.3 Trenching

The 2006 trench work uncovered about 30 plus piece of quartz vein that range from hand size with to a lot piece being 24 inch long by 12 thick by 18 inch wide. The intact quartz vein was not reach but must have being very near by.

8.0 RECOMMENDATION

I would recommend more trenching on the quartz vein. I would also recommended detail 25 meter station spacing soil work on Gold Anomaly B and C. The 2006 soil work was conducted on 50 meters station spacing compared to the 2005 survey that was on 25 station spacing. I feel the nature of small quartz vein structure that 25 meter station spacing would define the Gold Anomaly B and C better.

10.0 COST

Grid Work 26 KL @ $150.00 per KL	$3,900.00
Geology Work Aurum Geological	$3,126.05
Magnetic Survey 26 KL @ $250.00 per KL	$6,500.00
Wage 19 man days @ $250.00 per day	$4,750.00
Mobe / Demobe 8 man days @ $250.00	$2,000.00
Food Allowance 28 man days @ $42.50	$1,190.00
Assay Cost 527 soil @ $18.00 per sample Includes pre marked kraft bags, flagging, Drying packing samples and shipping cost to Vancouver.	$9,486.00
Boat and motor rental 8 days @ $125.00 per day	$1000.00
Four Wheeler Rental 8 days @ $100.00 per day	$800.00
Fix Wing Great River Air, Cesna 172 2 trips @ $500.00 per trip	$1000.00
Boat Gas 225 liter per trip @ $1.25 per liter @ 4 trips	$1,125.00
Boat Oil Mix 6 liter per trip @ 4 trips @$7.00 per liter	$168.00
Transport gear up Yukon River 2 men for 3 days = 6 man days @ $250.00	$1,500.00
Transporting gear from Yukon River edge to Thistle Mt By four wheeler and set up camp. 2 men for 1.5 days Equals 3 man days @ $250.00 per day	$750.00
Trenching work includes operator and Can Dig Hoe plus gas 2 days @ $600.00 per day	$1,200.00
Camp Supplies includes Sat Phone, 3 wall tents, cots, Kitchen supplies, wood stove 7 days @ $100.00 per day	$700.00
Report writing	$1000.00
Total	$40,195.00

11.0 QUALIFICATION

I Shawn Ryan located in Dawson City, Yukon work as a professional prospector. I run a small exploration company located in Dawson City.

I have worked in the exploration business for the last 25 years. I worked the first 12 years as a contractor working on numerous projects in the NWT, Ontario, Quebec and the Yukon. I have worked the last 8 years as a local prospector for myself.

I have being trained to run various geophysical instruments and surveys such as magnetic surveys, max-min surveys, induce polarity surveys and VLF surveys.

I have overseen the entire Black Fox Project and was party chief in charge.

I own 100% of the Black Fox claims.

Dated this 4 of April 2007 in Dawson City, Yukon.

Respectfully submitted

Shawn Ryan
