

VM Aug2011 095 - View to WSW showing headwater area of main VM creek

VM Aug2011 099 - qtz-carb vein; common on the property (although this was larger than most.)

VM Aug2011 103 - intersecting quartz-carb vns at StnTvm-29

VM Aug2011 104 - large bull quartz vein

VM Aug2011 108 - euhedral py in qtz

VM Aug2011 119 - claim post for VM100-99 & VM49-50; looking SE down VM creek

VM Aug2011 123 - grit/psammite in headwall at top of creek on VM100

VM Aug2011 124 - float boulder with cool sinusoidal qt vn gashes

VM Aug2011 042 - phyllites on top of ridge at VM 88 where you dropped me off

the day you left

VM Aug2011 049 - looking NE: contact between the gunsteel slates and the

grits & phyllites just NE off the property on VM87

VM Aug2011 050 - looking SE: contact between the gunsteel slates and the

grits & phyllites just NE off the property on VM87

VM Aug2011 051 - gunsteel slates NE off the property on VM87

VM Aug2011 052 - looking SW: contact between the gunsteel slates and the

grits & phyllites just NE off the property on VM87

VM Aug2011 053 - crenulation folds in foliated phyllites on VM88

VM Aug2011 061 -

VM Aug2011 089 - VM Camp

VM Aug2011 094 - more cool qt vn gashes in grit

VM 2011 029 - the green-grey boxworked sericitic shale/slate

IMGP0498 - camp after demob

VM 2011 007 - view to SW across creek on VM80; note layer cake appearance on

slate/shale with grits

VM 2011 011 - limy seds; LOOK CLOSE at the pale grey face mid-level a little

to the left of centre: this is a synformal fold about 4m across

VM 2011 016 - Stn Tvm-40: parasitic folds with axial planar cleavage in the limy seds - not compositional layers

VM 2011 018 - same as above

VM 2011 019 - same as above; rock hammer mimics axial hinge
