121.9	Veins			fecb	SHTV	15			Multiple vuggy buff colour sheeted veinlets, <1cm thick
123.5	Cleavage		Sx	chl	FOL	30			wispy grey-green seams at 0.5cm spacing
123.55	Contact			chl		70			Upper contact of phyllite interbed wedge that contains green chl veinlets
123.65	Veins			chl	SHTV	65			multiple5mm thick green veinlets in phyllite interbed
123.83	Contact					70			Lower contact of phyl interbed wedge
123.9	Cleavage			chl		25			wispy grey-green chl matrix seams at 1cm spacing
123.9	Veins			chl	FOL	25			1cm thick vein concordant to Sx
124.4	Veins			fecb	SHTV	30			1cm-10cm thick qzvns with buff coloured wisps, 5 veinlets over 80cm
125.5	Veins			chl		35			15cm thick qzvn with contact concordant qtz seams
125.6	Contact				FOL	45			Upper contact of phyl interbed
125.7	Contact					30			A 30cm sequence of coarse up to 3cm rounded qtz clasts
125.7	Contact				FOL	30			Lower contact of phy interbed wedge
126.25	Contact				FOL	45			Upper contact of phyl gouge zone concordant to So
128	Bedding		So			48			phyl compositional bedding/cleavage So
129.6	Axial Plane		Fx			50			Small scale closed fold profile
129.9	Bedding		So			20			phyl compositional bedding/cleavage So
130.13	Faults			py	Gouge	40			Diss sulphide in fault gouge
130.52	Faults			py	Gouge	80			Gouge concordant to So
130.52	Bedding		So		Gouge	80			Phyl comp bedding/cleavage
133	Veins			fecb	SHTV	60			flex folded deformed 1cm-20cm thick in gouged phyl
133.85	Bedding		So			70			Phyl comp bedding/cleavage
133.9	Veins			fecb	SHTV	70			Densely spaced flex folded foliation concordant, 1-4cm thick qzvns in phyl fault zone
134.15	Veins			fecb	mass	70			30cm thick fol concordant qzvn in phyl with a number of phyl ribboned inclusions
135.3	Veins				SHTV	55			Densely spaced thin qzvns in fecb altered seams
135.8	Axial Plane		Fx			50			Small scale parasitic profile
136	Bedding		So			60			Phyl comp bedding/cleavage
136.7	Contact			py	FOL	50			Phyl above, SS below, concordant to phyl So and coated with py+clay
137.65	Veins		V2			25			V2 crosscuts v1 at 20 degrees
137.65	Veins		V1	cbt	Veinlets	10			V2 crosscuts v1 at 20 degrees
138.5	Veins		V2		Veinlets	20			V2 crosscuts V1 at 60 degrees
138.5	Veins		V1	fecb	Veinlets	60			V2 crosscuts V1 at 60 degrees
139.5	Cleavage		Sx	cy		60			Alignment of wispy matrix seams with cy coating, 0.5cm spacing
139.7	Veins			chl	FOL	50			Variable width fol concordant qzvns with grey green chl rims
141.5	Contact				FOL	45			Upper contact of gouged phyl bed
142.4	Veins			fecb	SHTV	30			Repeated mildly flex folded 1-3cm flex folded veins with diffuse vn boundaries
143.8	Cleavage		Sx	chl		75			Stetched qtzclast and dark chl matrix seams
145	Cleavage		Sx			75			Dark grey wispy aligned matrix seams in SS sequence
146.45	Contact					30			Sharp upper contact of partially friable phyl interbed
146.84	Contact					75			Sharp lower contact of partially friable phyl interbed

Diamond Drill Log and Sample Summary

Project: NTR3A **Prospect:** Main Zone **Hole ID:** 3A-11-034 **Grant No.:** YC72728

Location

Easting:	Northing:	Latitude:	Longitude:
533752.1	6843934.0		

Elevation: 1538 m **Grid Name:** NA

Datum:	UTM Zone:	Grid N:	Grid E:
NAD83	9		

Orientation

Plunge: 80
Azimuth: 270
EOH: 342.0 m
Core Size: HQ

Start Date: 28/09/2011
Finish Date: 08/10/2011
Status: Completed
Contractor: Driftwood

Objective:
to follow up on Hole 3A-11-017

From	To	Mineral	Intensity	Distribution	Comments
11.3	12	FZ	200.0%	BFZ	Wide zone of brittle faulting with frequent large intervals of clay gouge. Variable intensities over the whole fault zone.
12	16.5	FZ	100.0%	BFZ	Wide zone of brittle faulting with frequent large intervals of clay gouge. Variable intensities over the whole fault zone.
16.5	21	FZ	400.0%	BFZ	Wide zone of brittle faulting with frequent large intervals of clay gouge. Variable intensities over the whole fault zone.
21	25	FZ	100.0%	BFZ	Wide zone of brittle faulting with frequent large intervals of clay gouge. Variable intensities over the whole fault zone.
25	29.5	FZ	200.0%	BFZ	Wide zone of brittle faulting with frequent large intervals of clay gouge. Variable intensities over the whole fault zone.
29.5	31.4	FZ	300.0%	BFZ	Wide zone of brittle faulting with frequent large intervals of clay gouge. Variable intensities over the whole fault zone.
31.4	33.8	FZ	200.0%	BFZ	Wide zone of brittle faulting with frequent large intervals of clay gouge. Variable intensities over the whole fault zone.
33.8	36	FZ	400.0%	BFZ	Wide zone of brittle faulting with frequent large intervals of clay gouge. Variable intensities over the whole fault zone.
36	37.1	FZ	100.0%	BFZ	Wide zone of brittle faulting with frequent large intervals of clay gouge. Variable intensities over the whole fault zone.
37.1	42.5	FZ	300.0%	BFZ	Wide zone of brittle faulting with frequent large intervals of clay gouge. Variable intensities over the whole fault zone.
42.5	43.5	FZ	100.0%	BFZ	Tapering out of the fault zone… still narrower gouge zones present but much more competent rock
43.9	52.2	FZ	200.0%	BFZ	Zone with reasonably abundant fault gouge seams
45.5	43.9	FZ	400.0%	BFZ	Thin fault gouge zone
52.2	53	FZ	400.0%	BFZ	Completely grey clay gouge
54	54.8	FZ	200.0%	BFZ	fragmented brecciating fault zones cemented by grey clay fault gouge
57.2	62.5	FZ	300.0%	DBSZ	Very abundant fault gouge… preserved fragments show intense folding/shearing of quartz veins (textural features of phyllite mostly destroyed already) This leads me to think that this may be a ductile shear zone or fold hinge that has been reactivated as a brittle fault later in its life
62.5	66.15	QZVN	300.0%	BFZ	Abundant quartz-carboante tension veining with minor clay fault gouge… possible. Folded bedding shows presence of ductile freatures… but it is unclear if this folding is related to the localisation of the fault and veining as it is relatively open and gentle.
73.45	75.75	FZ	100.0%	BFZ	Zone with broken up core and minor intervals of clay fault gouge
81.9	87.4	QZVN	300.0%	DBSZ	Brittle-ductile quartz-vein rich zone where veining and hostrock is folded, partially brecciated in places ad shows minor brittle fault intervals
88.55	89.2	FZ	200.0%	BFZ	Fault gouge with some fault fill veining
92.2	93.9	QZVN	200.0%	BFZ	Vuggy quartz veining with carbonate and feo lining vugs…. Possible ductile component now overprinted by the brittle features.
93.9	96	SZ	200.0%	DBSZ	Brittle-ductile shear zone with folding and pervasive stretching of veining and reorienting of bedding
96	103.2	QZVN	100.0%	DBSZ	Abundant quartz veining showing folding/shearing and brittle vuggyness and brecciating features.
109.85	110.8	FZ	100.0%	BFZ	blocky fractured core with some clay fault gouge and some fault filling quartz veining/.
118.9	121.1	QZVN	100.0%	BFZ	Rare seams of fault gouge… abundant indications of deformation including disrupted and brecciating veining.
128.7	130.05	FZ	200.0%	BFZ	Abundant intervals of clay fault gouge and clay filled fractures/veinlets
138	141.5	FZ	400.0%	BFZ	Black to grey clay fault gouge.
141.5	144.55	QZVN	400.0%	bx	Quartz-vein-breccia cemented with grey clay and pyrite and lesser arsenopyrite. Clast supported 90% quartz vein fragments ranging in size from 1mm-2cm.
144.55	147.52	FZ	300.0%	bx	Abundant gouge and brecciation by quartz veining. Still abundant pyr and asp.

Depth	Structure	struct_code	Generation	Coating	Habit	CA	Beta_Angle	Gamma	Comments
120.6	Faults	38		cy	Gouge	50			2cm wide seam of fault gouge
120.9	Faults	38		cy	Gouge	70			10cm wide seam of fault gouge with 3cm-wide fault-filling quartz vein.
121.7	Veins	38		qtz		10			2cm wide quartz vein with 1% asp concentrated near the edge of the vein
122.7	Veins	38		qtz		50			6 cm wide quartz fault-fill vein with abundant (5%) pyrite and arsenopyrite
123.3	Veins	38		qtz	SHTV	60			Vuggy pyrite, bearing quartz vein set. 3-6mm
123.35	Veins	38		qtz	SHTV	40			quartz veining with up to 5% arsenopyrite
135.5	Veins	38		qtz		35			pyrite bearing, edge-blurring quartz vein (almost invisible in the quartz pebble conglomerate… partially due to a quartz-flooding selvage)
143.3	Veins	38		qtz	SHTV	30			white quartz carbonate vein with pyrite and arsenopyrite. 3mm wide
143.6	Veins	38		asp	SHTV	55			arsenopyrite stringers.
146.9	Veins	38		asp	SHTV	30			arsenopyrite stringers.
147.1	Veins	38		asp	SHTV	60			arsenopyrite stringers.
147.9	Veins	38		qtz	SHTV	20			Minor pyrite. Cuts the quartz vein that is at ~40CA at same location displaces it by 1 cm
147.9	Veins	38		qtz	SHTV	40			Cut by the quartz vein that is at 20 CA and is displaced by it by ~1 cm. Pyrite bearing.
148.65	Veins	38		qtz	SHTV	35			pyrite and sphalerite bearing quartz vein
152	Veins	38		qtz	SHTV	10			folded quartz veining with some euhedral pyrite… range from 2mm to 3cm in width
152.05	Fold axes	18	F1			35			
152.15	Fold axes	79	Fx			80			
152.3	Cleavage	17	Sx			55			Shear zone… some possible mylonitization
152.8	Fold axes	19	F2			15			assymetrical, tight folding of bedding, thin quartz veining and cleavage
152.8	Veins	38			SHTV	70			Bedding parallel quartz veinig with abundant euhedral pyrite cubes
154.55	Faults	38			Gouge	50			thin, 2mm, clay fault gouge
154.6	Bedding	46	So			70			
154.6	Bedding	46	So			50			
156	Veins	38				70			Cut and displaced approx 5mm by vein at 45CA… Quartz-carboante-pyrite vein
156	Veins	38				45			Quartz-carboante-pyrite vein. Cuts and displaces vein at 70CA by approx 5mm
156.5	Veins	38			SHTV	70			Sheeted pyrite-rich veinlets parallel to bedding/cleavage
159.3	Faults	38			Gouge	60			Fault gouge
160.7	Veins	38		qtz		20			qtz-sericite veins with some minor carbonate and pyrite. Irregular parasitic folding.
162.4	Bedding	46	So			80			
163.5	Veins	38		qtz		20			Sub-parallel quartz vein set with minor pyrite, size ranges from 1mm-2cm.
174.55	Faults	38				45			microfault
174.56	Fold axes	79	Fx			70			
175.3	Bedding	46	So			50			
176.85	Veins	38		qtz		35			Large (10cm) quartz vein with minor carbonate and arsenopyrite.
177.2	Veins	38		qtz		10			Quartz vein with minor carboante and pyrite cut by a series of sheeted quartz-carbonate veins (CA 50)
177.25	Veins	38		qtz	SHTV	50			quartz-carbonate veining with minor sulfides cut and slightly displace the quartz vein at CA10. range from 2-5mm
180.6	Veins	38		qtz	STWK	35			Dominant veining direction in the stockworked, crackle vein network. Up to 20% carbonate.
181.5	Veins	38		qtz	Open	50			vuggy quartz-carbonate vein with pyrite and arsenopyrite

273	61.4	272.54	56936	Reflex	1
311	62.6	272.64	56958	Reflex	1

Objective:

The objective of this drill hole is to test the 3Ace Fault and continuation of gold/arsenopyrite mineralisation 25m north of 3A-11-014. Target expected at70 m to 80 m.

Lithology

From:	To:	Description:	Rock Code:	Text:	Prop:	Colour:	Clasts:	Clast %	CI	SI
0	7.5	no core recovered	CASING		100.0%				co	1
7.5	58	Very minor quartz veining within phyllite unit in form of occassional <2mm thick quartz seams with calicite coating.	QZVN		1.0%	w			br	2
7.5	58	Black folded phyllite with thin, grey laminar silit along compositional bedding. [- 5-10% silt] Texture of phyllite is too fine-grained to determine exact composition. Unit is blocky, gouged and crushed throughout with only rare competent intersections that generally do not exceed 1m in length. Mulitple small-scale parasitic fold profiles are discernible throughout. [see point structures] Lower contact of unit is with massive white quartz vein.	MT-Phy		99.0%	n			br	2
58	59	Massive white quartz vein that is poorly recovered and has fragmented contacts. Both upper and lower contacts are bounded by phyllite gouge. Disseminated pyrite in vein fragments at vein contacts. Vein alterations: - chlorite - calcite - sercite	QZVN		100.0%	w			lc	1
59	87.5	Very minor quartz veining within phyllite unit in form of occassional <2mm thick quartz seams with calicite coating.	QZVN		1.0%	w			br	2
59	87.5	Black folded phyllite with thin, grey laminar silit along compositional bedding. [- 5-10% silt] Texture of phyllite is too fine-grained to determine exact composition. Unit is blocky, gouged and crushed throughout with only rare competent intersections that generally do not exceed 1m in length. Mulitple small-scale parasitic fold profiles are discernible throughout. [see point structures] Lower contact of unit is gouged and and sharp bounding a foliated Quartz-Conglomerate-Breccia unit below.	MT-Phy		99.0%	n			br	2

Project:	NTR3A	Prospect:	Main Zone	Hole ID:	3A-11-035	Grant No.:	YC72728
Plunge:	60	Azimuth:	270	EOH:	311		

From:	To:	Description:	Rock Code:	Text:	Prop:	Colour:	Clasts:	Clast %	CI	SI
87.5	94.6	Quartz veining in sheared quartz-conglomerate breccia occurs as up broader, massive veins near upper contact of unit. In remainder of unit, veining is generally <4cm thick at variable orientaions (occassionally concordant to Ssh) and with rather diffuse vein boundaries.	QZVN		5.0%	w			co	2
87.5	94.6	Foliated Quartz Conglomerate Breccia with ~4% white clay altered feldspar clasts and stretched, lenselike, aligned quartz clasts surrounded by ~2% dark grey chloritic matrix seams. [low grade shearing Ssh] Localiazed narrow broken and friable subintervals with occassional narrow gouge or slightly friable wedges. Generally competent. Composition: 96% white quartz; 4% white clay altered feldspar; 1% black phyllite lithics (phyllite lithics occur at variable clast sizes and are not evenly distributed) Grainsize: 0.5-2cm (due to lenselike stretching of quartz clasts Matrix: ~2% Grainshape: subangular	MT-CO	bx	95.0%	gy	qtz	95	co	2
94.6	95.6	quartz vein fragments in phyllite gouge and vuggy, sheeted quartz veining in fault emplaced sandstone interbed at center of interval	QZVN		1.0%	w			fr	2
94.6	95.6	25cm thick sanstone interbed within phyllite gouge fault structure: Sandstone is emplaced by faulting and veins in sandstone are cut-off at sharp planar contacts with phyllite gouge [see point structures] Sandston has fabric (bedding?) in form of dark grey chloritic lamellae at 4mm spacing [Sx]. Grainsize: 0.5mm Composition: 92% quartz; 8% white clay altered feldspar	MT-SS	mgr	10.0%	gy	qtz	92	co	1
94.6	95.6	Graphitic phyllite gouge that retains polished black cleavages and features fine-grained disseminated sulfides (predominantly pyrite). Texture of phyllite gouge is too fine-grained to determine exact composition. Upper contact with quartz conglomerate breccia above is slightly friable and planar along 65TCA. Lower contact iwith silicified sandstone unit below is hard and planar along 80TCA.	MT-Phy	gf	89.0%	n			fr	3
95.6	113	Dark grey silicified Sandstone-granule size Quartz Conglomerate sequence with gradational transitions. Lower half of unit is dominated by granule size clasts. Grainsize: 0.25-1mm (sandstone) 2-4mm (granule size) Composition: 96% grey and white-grey quartz; 4% white, clay altered feldspar Matrix: ~1-2% dark grey chloritic Fabric: dark grey, wispy, aligned chloritic seams throughout unitat 2-8mm spacing Both upper and lower contacts are sharp and planar with deformed phyllite units.	MT-SS	mgr	20.0%	gy	qtz	96	co	1
95.6	113	Quartz veining in silicified sandstone-conglomerate sequence is densely distributed (~10 veins per 50cm) and of variable orientation. Quartz Veining: - milky white and generally not vugy - contains occassional smal, buff iron-carbonate specs - ranges from 2mm-10cm in thickness - occurrs at variable orientations and is frequently intersecting - frequently undulated, deformed and folded - sometimes not fully penetrative - arsenopyrite and (to a lesser) pyrite mineralized within veining and in silicified wallrock	QZVN		20.0%	w			co	2

293	Bedding		So			60			compositional bedding in graphitic phyllite
294.1	Axial Plane		Fx	py		20			stretched, aligned pyrite bleb along axial plane of flex fold in compositional bedding
294.1	Bedding		So			70			flex folding in compositional bedding in graphitic phyillite
296.5	Veins			chl	FOL	40			densely spaced, deformed, greenish vein seams (5 over 2cm width) concordant to locally shallowed So
296.5	Veins			chl	BOUD	40			densely spaced, deformed, greenish vein seams (5 over 2cm width) concordant to locally shallowed So
297.4	Veins			fecb	SHTV	20			partially penetrative iron-carbonae seams that off-set So
297.4	Faults			fecb	SHTV	20			partially penetrative iron-carbonae seams that off-set So
297.4	Veins			fecb	FOL	50			deformed quartz-iron-carbonate seams concordant to So
297.4	Veins			fecb	SHTV	50			deformed quartz-iron-carbonate seams concordant to So
297.4	Bedding		So			50			compositional bedding in graphitic phyllite
298.6	Veins			fecb	bx matrix	50			~6cm thick, deformed quartz wedge concordant to So ant with angular phyllite clast inculsions
298.6	Bedding		So			50			compositional bedding in graphitic phyllite
298.8	Faults				bx matrix	50			breccia textured, graphitic phyllite, ~3cm thick gouge seam; intersects So at 80 degrees
298.8	Bedding		So			50			compositional bedding in graphitic phyllite
302.4	Axial Plane		Fx			50			mulitple parasitic folds on 20cm width fold profile
302.4	Bedding		So			5			compositional bedding in graphitic phyllite on 20cm width fold profile
302.42	Veins			fecb	AXP	50			singular axial planar parallel veinlet on 20cm width fold profile

Project: NTR3A **Prospect:** Main Zone **Hole ID:** 3A-11-035 **Grant No.:** YC72728

Plunge: 60 **Azimuth:** 270 **EOH:** 311

Depth	Structure	struct_code	Generation	Coating	Habit	CA	Beta_Angle	Gamma	Comments
303.3	Bedding		So			40			compositional bedding in graphitic phyllite
303.3	Veins			fecb	bx matrix	40			deformed web-like iron-carbonate seams framework with angular phyllite inclusions; vein intersects So at right angle
304.6	Bedding		So			35			compositional bedding in graphitic phyllite on 20cm width fold profile
304.8	Faults					40			lower contact of ~10cm width sandstone wedge with veining in sandstone cut-off at contacts with graphitic phyllite
304.8	Contact					40			upper contact of ~10cm width sandstone wedge with veining in sandstone cut-off at contacts with graphitic phyllite
304.9	Contact					40			upper contact of ~10cm width sandstone wedge with veining in sandstone cut-off at contacts with graphitic phyllite
304.9	Faults					40			lower contact of ~10cm width sandstone wedge with veining in sandstone cut-off at contacts with graphitic phyllite
305.95	Axial Plane			py		30			closed parasitic fold profile with stretched pyrited wisps aligned parallel to axial plane
306.2	Bedding		So			25			compositional bedding in graphitic phyllite on 20cm width fold profile
306.2	Cleavage		S1			60			S1 intersects So at 40 degrees
308	Bedding		So			40			compositional bedding in graphitic phyllite on 20cm width fold profile
308.2	Veins			py	FOL	60			stretched, deformed 1-3cm thick, ribboned, densely spaced veinlets over 20cm width; concordant to So
308.2	Veins			fecb	SHTV	60			stretched, deformed 1-3cm thick, ribboned, densely spaced veinlets over 20cm width; concordant to So
310.3	Veins			chl	SHTV	60			densely spaced seams over 10cm width that intersect So at 10 degrees; multiply folded
310.3	Veins			chl	SHTV	30			densely spaced seams over 10cm width; multiple folded and deformed; intersect So at 45 degrees [posibbly concordant to S1]
310.3	Bedding		So			70			compositional bedding in graphitic phyllite on 20cm width fold profile
310.96	Veins			fecb	FOL	30			3cm thick quartz-iron-carbonate veinlet concordant to So
311	Bedding		So			30			compositional bedding in graphitic phyllite on 20cm width fold profile

Assessment Report on 2011 Exploration Activity on the 3Ace Property: Drilling, Geochemical, and Geophysical Surveys, Little Hyland River Area, YT.

Volume 5: Appendix 5: Silt and Rock Certificates of Analysis

3Ace Property
Watson Lake Mining District

Grant Numbers and Claim Names:

North Claim Group

YD59330-YD59337 (**Ace 23-30**), YD59340-YD59347 (**Ace 33-40**), YD59374 (**Ace 67**), YD25475-YD25478 (**Al 75-78**), YD11184-YD11191 (**Al 103-110**), YD25501-YD25504 (**Al 111-114**), YD25031-YD25082 (**Fred 1-52**), YD2557-YD25582 (**Fred 249-274**), YD25531-YD2556 (**Fred 275-300**), YD25506-YD25530 (**Fred 301-326**), YD26151-YD26346 (**Full 1-196**)

South Claim Group

YB91751 (**3 Ace 61**), YD07109-YD07128 (**Ace 1-20**), YD59328-YD59329 (**Ace 21-22**), YD59338-YD59339 (**Ace 31-32**), YD59348-YD59459 (**Ace 41-152**), YD25401-YD25474 (**Al 1-74**), YD25479-YD25500 (**Al 79-100**), YD11182-YD11183 (**Al 101-102**), YD10850-YD10859 (**Cozy 1-10**), YD26101-YD26150 (**House 1-50**), YD29165-YD29199 (**Jack 5-39**), YD18939-YD18936 (**Jake 1-4**), YD58282-YD58297 (**Jake 5-20**), YD10920-YD10923 (**Jan 1-4**), YD24701-YD24800 (**Joe 1-100**), YD11176-YD11177 (**Joe 101-102**), YC72439-YC72459 (**King 1-18**), YC89511-YC89520 (**King 19-28**), YC72724-YC73733 (**King 29-38**),YC73284-YC295 (**King 39-50**), YC73848-YC73859 (**King 51-62**), YC89521-YC89530 (**King 63-72**), YD07129-YD07138 (**King 73-82**), YD10860-YD10919 (**King 83-112**), YD24901-YD24982 (**OCS 1-82**), YD11172 (**Queen 1**), YD07139-YD07148 (**Queen 2-11**), YD11173-YD11175 (**Queen 12-14**) , YB85182-YB85191 (**Sprogge 1-10**), YB85338-YB85381 (**Sprogge 11-54**), YB85781-YB85800 (**Sprogge 54-74**), YD25135-YD25154 (**Texas 1-20**)

Location	Samples	Type	Preparation Description
Whitehorse, YT	196	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Description: **3 ACE**

Date Received: 08/03/2011
Date Completed: 08/19/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	150	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Location	Samples	Type	Preparation Description
Whitehorse, YT	3	Silt	

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Project: **3 ACE**
Purchase Order: **Rock 1**
Description: **3 ACE**

Date Received: 08/03/2011
Date Completed: 08/19/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	55	Rock	SP-RX-2K/Rock/Chips/Drill Core

Location	Method	Description
Vancouver, BC	Au-1AT-GV	Au, 1AT, Gravimetric
Vancouver, BC	50-4A-UT	50 Element, 4 Acid, ICPMS, Ultra Trace Level
Vancouver, BC	Au-2AT-AA	Au, 2AT Fire Assay, AAS
Vancouver, BC	Pb-4A-OR-AA	Pb, Ore Grade, 4 Acid, AA

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Project: **3 ACE**
Purchase Order: **Core 1**
Description: **3 ACE**

Date Received: 08/09/2011
Date Completed: 08/25/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	88	Rock	SP-RX-2K/Rock/Chips/Drill Core

Location	Method	Description
Vancouver, BC	50-4A-UT	50 Element, 4 Acid, ICPMS, Ultra Trace Level
Vancouver, BC	Au-2AT-AA	Au, 2AT Fire Assay, AAS
Vancouver, BC	Pb-4A-OR-AA	Pb, Ore Grade, 4 Acid, AA

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	64	Rock	SP-RX-2K/Rock/Chips/Drill Core

Location	Method	Description
Vancouver, BC	50-4A-UT	50 Element, 4 Acid, ICPMS, Ultra Trace Level
Vancouver, BC	Ag-4A-OR	Ag, 4 Acid, AA, Ore Grade
Vancouver, BC	Au-2AT-AA	Au, 2AT Fire Assay, AAS
Vancouver, BC	Pb-4A-OR-AA	Pb, Ore Grade, 4 Acid, AA

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Purchase Order: **Rock 4**
Description: **3 ACE**

Date Received: 08/31/2011
Date Completed: 09/14/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	36	Rock	SP-RX-2K/Rock/Chips/Drill Core

Location	Method	Description
Vancouver, BC	50-4A-UT	50 Element, 4 Acid, ICPMS, Ultra Trace Level
Vancouver, BC	Au-2AT-AA	Au, 2AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Project: **3 ACE**
Purchase Order: **Rock 5**
Description: **3 ACE**

Date Received: 09/08/2011
Date Completed: 09/27/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	48	Rock	SP-RX-2K/Rock/Chips/Drill Core

Location	Method	Description
Vancouver, BC	Au-1AT-GV	Au, 1AT, Gravimetric
Vancouver, BC	50-4A-UT	50 Element, 4 Acid, ICPMS, Ultra Trace Level
Vancouver, BC	Au-2AT-AA	Au, 2AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Location	Samples	Type	Preparation Description
Whitehorse, YT	80	Rock	SP-RX-2K/Rock/Chips/Drill Core

Location	Method	Description
Vancouver, BC	50-4A-UT	50 Element, 4 Acid, ICPMS, Ultra Trace Level
Vancouver, BC	Au-2AT-AA	Au, 2AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	17	Rock	SP-RX-2K/Rock/Chips/Drill Core

Location	Method	Description
Vancouver, BC	50-4A-UT	50 Element, 4 Acid, ICPMS, Ultra Trace Level
Vancouver, BC	Au-2AT-AA	Au, 2AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Project: **3 ACE**
Purchase Order: **Rock 8**
Client Reference: **Rock 8**
Description: **3 ACE**

Date Received: 10/04/2011
Date Completed: 10/21/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	111	Rock	

Location	Method	Description
Vancouver, BC	50-4A-UT	50 Element, 4 Acid, ICPMS, Ultra Trace Level
Vancouver, BC	Au-2AT-GV	Au, 2AT, Gravimetric
Vancouver, BC	Au-2AT-AA	Au, 2AT Fire Assay, AAS
Vancouver, BC	Cu-4A-OR-AA	Cu, Ore Grade, 4 Acid, AA

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Date Received: 09/27/2011
Date Completed: 10/14/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	68	Rock	SP-RX-2K/Rock/Chips/Drill Core

Location	Method	Description
Vancouver, BC	50-4A-UT	50 Element, 4 Acid, ICPMS, Ultra Trace Level
Vancouver, BC	Au-2AT-AA	Au, 2AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Project: **3 ACE**
Purchase Order: **Rock 9**
Description: **3 ACE**

Date Received: 10/17/2011
Date Completed: 11/03/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	23	Rock	SP-RX-2K/Rock/Chips/Drill Core

Location	Method	Description
Vancouver, BC	Au-1AT-GV	Au, 1AT, Gravimetric
Vancouver, BC	50-4A-UT	50 Element, 4 Acid, ICPMS, Ultra Trace Level
Vancouver, BC	Au-2AT-AA	Au, 2AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Client Reference: **Rock 10**
Description: **3 ACE**

Date Received: 11/10/2011
Date Completed: 11/28/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	7	Rock	SP-RX-2K/Rock/Chips/Drill Core

Location	Method	Description
Vancouver, BC	Zn-4A-OR-AA	Zn, Ore Grade, 4 Acid, AA
Vancouver, BC	50-4A-UT	50 Element, 4 Acid, ICPMS, Ultra Trace Level
Vancouver, BC	Ag-4A-OR	Ag, 4 Acid, AA, Ore Grade
Vancouver, BC	Au-2AT-AA	Au, 2AT Fire Assay, AAS
Vancouver, BC	Pb-4A-OR-AA	Pb, Ore Grade, 4 Acid, AA

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Project: **3 ACE**
Purchase Order: **Rock 12**
Client Reference: **Rock 12**
Description: **3 ACE**

Date Received: 12/01/2011
Date Completed: 01/03/2012
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	13	Rock	SP-RX-2K/Rock/Chips/Drill Core

Location	Method	Description
Vancouver, BC	50-4A-UT	50 Element, 4 Acid, ICPMS, Ultra Trace Level
Vancouver, BC	Au-Met500-AA	Au Metallic Screen (500g) AA Finish
Vancouver, BC	Au-2AT-AA	Au, 2AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Vancouver, BC	68	Pulp	SP-PU/Pulp Handling, submitted pulps

Location	Method	Description
Vancouver, BC	Hg-AR-TR-CVAA	Hg, AQR, CVAA, Trace Levels

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Project: **3 ACE**
Description: **3 ACE**

Date Received: 08/09/2011
Date Completed: 08/25/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	184	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	186	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	154	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Description: **3 ACE**

Date Received: 08/09/2011
Date Completed: 08/25/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	120	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Project: **3 ACE**
Description: **3 ACE**

Date Received: 08/10/2011
Date Completed: 08/29/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	209	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Attention: **Greg Hayes**

Project: **3 ACE**
Description: **3 ACE**

Date Received: 08/11/2011
Date Completed: 09/12/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	202	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Location	Samples	Type	Preparation Description
Whitehorse, YT	195	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Location	Samples	Type	Preparation Description
Whitehorse, YT	115	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Project: **3 ACE**
Description: **3 ACE**

Date Received: 08/15/2011
Date Completed: 09/06/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	176	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Project: **3 ACE**
Purchase Order: **soil 3**
Description: **3 ACE**

Date Received: 08/19/2011
Date Completed: 09/14/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	217	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Date Completed: 09/14/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	143	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	146	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Date Completed: 09/14/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	119	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Project: **3 ACE**
Purchase Order: **Soil 4**
Description: **3 ACE**

Date Received: 09/01/2011
Date Completed: 09/27/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	164	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Purchase Order: **Soils 4**
Description: **3 ACE**

Date Received: 09/02/2011
Date Completed: 09/22/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	178	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Description: **3 ACE**

Date Received: 09/07/2011
Date Completed: 10/09/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	105	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Description: **3 ACE**

Date Received: 09/02/2011
Date Completed: 09/26/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	117	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.

Project: **3 ACE**
Purchase Order: **Soil 4**
Description: **3 ACE**

Date Received: 09/06/2011
Date Completed: 09/27/2011
Invoice:

Location	Samples	Type	Preparation Description
Whitehorse, YT	161	Soil	SP-SS-1K/Soils, Humus Sediments 1kg dried, sieved and riffle split

Location	Method	Description
Vancouver, BC	50-AR-UT	50 Element, Aqua Regia, ICPMS, Ultra Trace Level
Vancouver, BC	Au-1AT-AA	Au, 1AT Fire Assay, AAS

The results of this assay were based solely upon the content of the sample submitted. Any decision to invest should be made only after the potential investment value of the claim or deposit has been determined based on the results of assays of multiple samples of geologic materials collected by the prospective investor or by a qualified person selected by him and based on an evaluation of all engineering data which is available concerning any proposed project. For our complete terms and conditions please see our website at www.inspectorate.com.
