18-31m @ 127°  
31-36m @ 133°

### LEGEND:

Water table

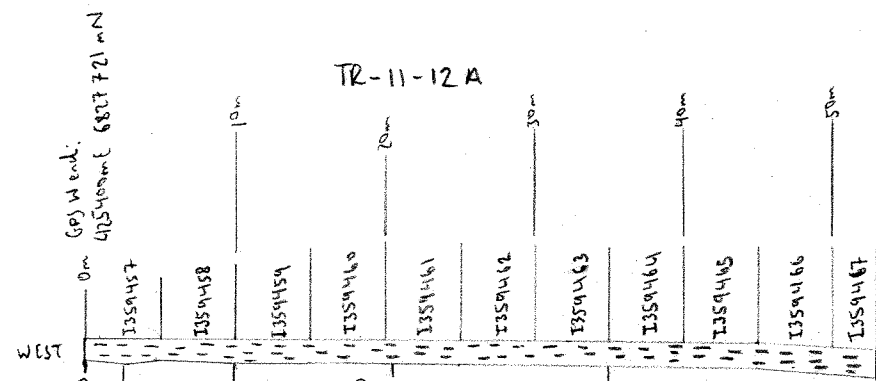

LITHOLOGIES:

Argillite

### Abbreviations:

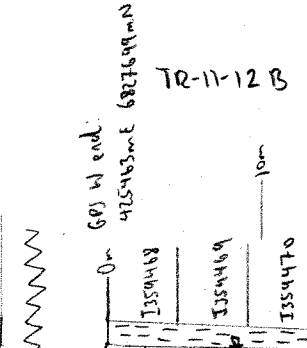

qt = Quartz  
mzn = mineralization  
alt'n = alteration

TR-11-12 A

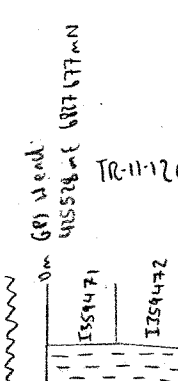

GRAPHITIC ARGILLITE  
Finely foliated, pervasive orange & red alt'n on fractures, dull metallic luster on foliation planes.  
@15m: Silvery mzn, approx. in a lineation.  
@5-6m: Fine grey volcanic float w/ red & orange alt'n.  
@10m: Grey microcrystalline float.  
@14m: More fine grey volcanic float w/ green, yellow & orange alt'n.  
@20.5m: Qtz-rich, sugary w/ manganese & limonite alt'n on fractures.  
@18m: Volcanic float w/ green, yellow & orange alt'n.  
@35m: Folded qz veins in well-foliated argillite float.  
@37m: ~30% massive qz in argillite.  
@41m: Folded qz veins cross-cutting laminations.

TR-11-12 B

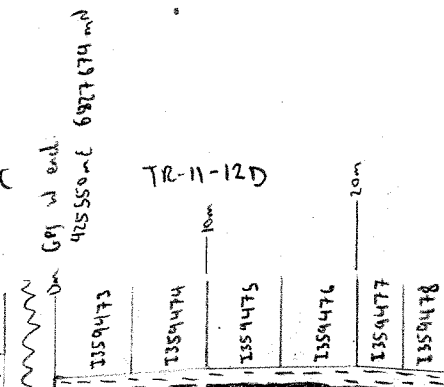

GRAPHITIC ARGILLITE  
Light to dark grey, lightly foliated. Qtz rich. Black/brown to blue/grey on fractures. Very fragmented.  
@12m: Extensive qz, massive to foliated, w/ minor limonite on fractures.  
@5-6m & 9.5-10m: Presence of massive to foliated qz, pos. fragmented veins.

TR-11-12 C

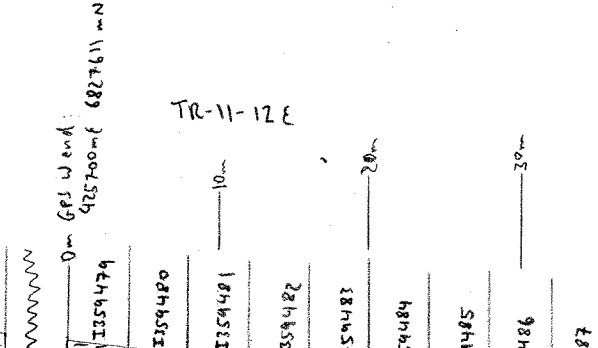

GRAPHITIC ARGILLITE  
Very finely laminated, lightly foliated.  
@1m: Well foliated float, rich in coarse green platy mineral & extensive orange alt'n.  
@4m: Approx bedding 302/28 NE.  
@8m: Extensive qz veining.  
@20-21m & 23.5m: Qtz-rich, extensive qz chips.

TR-11-12 D

GRAPHITIC ARGILLITE  
Flaky, foliated. Gold/brown waxy alt'n on foliation planes. Pitted. Extensive calcite veining, both folded & parallel to folia.  
@18m: Several angular massive qz float, extensive limonite on all fractures.

TR-11-12 E

GRAPHITIC ARGILLITE  
Dark grey/black, finely foliated. Pale yellow oily alt'n. Flaky, fractured. Pitted qz, pits infilled w/ limonite. Orange/brown & green/yellow alt'n on fractures, ± 15% pits.  
@2m: Subangular pits ≤ 4mm.  
@7.5m: Massive qz float, red-orange alt'n on fractures.  
@18m: Subrounded massive qz w/ limonite & hematite on fractures.  
@22m: Strongly pitted qz-rich float.  
@25m: Well-folded veing.

4x Vertical exaggeration
