

Total Magnetic Intensity (nT)

Survey and Equipment:
-Survey flown on August 15, 2010 to September 26, 2010.

-Survey Base: Gimlex camp, Indian river, YT.
-Scintrex CS-3 cesium vapor magnetic sensor used to sample the Earth's magnetic field at 10Hz.

-All radiometric data sampled at 1Hz by 8.4L of NaI synthetic crystal.

- The survey was flown under variable snow cover.
