

Figure 3. Simplified geology of south central Yukon with emphasis on Late Triassic to Jurassic plutonic suites as described in text. Significant Early Jurassic Cu – gold ± silver mineral occurrences shown by triangles. Main map coloured by terrane with Whitehorse trough and younger cover sequences in brown and yellow, respectively. Inset Yukon terrane map to lower left shows the area of the main map with Late Triassic to Jurassic plutonic rocks in orange. Map, data and caption from Yukon Geological Survey (2015).
