Protem Equipment	AGL	1
Truck	AGL	1

<b>Comments</b>
<b>Weather</b>
Sunny and warm

<b>Notes (production comments, incidents, other)</b>
<p>Left Whitehorse at 800am for Mayo.</p> <p>Arrived early for 300pm flight but Blacksheep Aviation was running behind schedule. Ended up taking off closer to 430pm, leaving behind 1300lbs of mostly IP gear to come in later.</p> <p>Matt from GSR came over to meet us at Spit Lake camp for an orientation and setup.</p> <p>Spent time creating .gpx files for waypoints and maps of the grid.</p>

<b>PREPARED BY:</b>
Shawn Scott

<b>LOGISTICS</b>		
Type	Contractor	Hrs or units
Protem Equipment	AGL	1

### Comments

#### Weather

Hot. Cold at night.

### Notes (production comments, incidents, other)

Safety meeting 715am.  
Helicopter pick up at 730am.  
Back in camp 545pm.  
Set up on the southern portion of Line 1000. Had persistent issues with a poor response and gain issues all day long. Impossible to dump the Protem receiver for hours at night, finally getting data off of it after midnight sometime.

Protem Equipment	AGL	1

<b>Comments</b>
<b>Weather</b>
Mixed sun and cloud

<b>Notes (production comments, incidents, other)</b>
Safety meeting 715am. Helicopter pick up at 730am. Identified gain issues in the preamp of the Protem receiver and set out to retry the beginning of Line 1000 over again. Still not happy with the gain or the resp[onse so took plenty of repeats and tried longer integration times. Back in camp 545pm. Continued problems dumping the receiver.

**DATE:**

Thursday, August 3, 2017

**PREPARED BY:**

Shawn Scott

### LOGISTICS

Type	Contractor	Hrs or units
Protem Equipment	AGL	1

### Comments

#### Weather

Mixed sun and cloud. Some rain.

### Notes (production comments, incidents, other)

Safety meeting 715am.  
Helicopter pick up at 730am.  
Continued working on Line 1000 but in an effort to speed up production started running two loops so that the crew could move one to leapfrog the other. This method was exhausting but hopes are it could work better once we refine our methods tomorrow.  
Back in camp 545pm.

<b>PREPARED BY:</b>
Shawn Scott

<b>LOGISTICS</b>		
Type	Contractor	Hrs or units
Protem Equipment	AGL	1

### Comments

#### Weather

Very hot.

### Notes (production comments, incidents, other)

Safety meeting 715am.  
 Helicopter pick up at 730am.  
 Finished Line 1000 and dragged all equipment and wires to a flat area on the Hess River, where they were wound up more easily. Got the helicopter to bump us to the top of Line 2000 but there was no pad. There was one farther down the hill but we used one that the linecutters had made by mistake when they first started cutting. It was equally far but less uphill. Still took over an hour to hike in the heavy wire before setting up again.  
 Back in camp 545pm.

## Goldstrike Geophysics GSR-17108-YT

**DATE:**

Sunday, August 6, 2017

**PREPARED BY:**

Shawn Scott

### LOGISTICS

Type	Contractor	Hrs or units
Protem Equipment	AGL	1

### Comments

#### Weather

Very hot again.

### Notes (production comments, incidents, other)

Safety meeting 700pm  
Helicopter pick up at 1000am.  
Bear in camp in the morning. Took food but Hannah scared it off with an air horn. Spent parts of the morning cleaning up and stashing food in the full-walled shack.  
Set out and brought a chainsaw to the top of the hill to carve out a useful pad that could help with IP when we return to Line2000.  
Back in camp 545pm.

## Goldstrike Geophysics GSR-17108-YT

**DATE:**

Monday, August 7, 2017

**PREPARED BY:**

Shawn Scott

### LOGISTICS

Type	Contractor	Hrs or units
Protem Equipment	AGL	1

### Comments

#### Weather

Still very hot. 32 degrees in camp.

### Notes (production comments, incidents, other)

Safety meeting 715am.  
Helicopter pick up at 730am.  
Good productive day on Line 2000. Very hot out,  
heat stroke is a real risk.  
Back in camp 545pm.

Protem Equipment	AGL	1

### Comments

#### Weather

Mixed sun and cloud

### Notes (production comments, incidents, other)

Safety meeting 715am.  
Helicopter pick up at 755am.  
Finished Line 2000, got bumped to Line 3000.  
Back in camp 545pm.

## Goldstrike Geophysics GSR-17108-YT

**DATE:**

Thursday, August 10, 2017

**PREPARED BY:**

Shawn Scott

### LOGISTICS

Type	Contractor	Hrs or units
Protem Equipment	AGL	1

### Comments

#### Weather

High cloud, finally a little less hot. Forest fire visible to the north, across the Hess River.

### Notes (production comments, incidents, other)

Safety meeting 715am.  
Worked down L3000, starting on the edge of the swamp from yesterday, hitting excellent ground for a while and then back to thick bush and steep ground at the end of the day. Still, most productive day yet.  
Back in camp 1750h.

## Goldstrike Geophysics GSR-17108-YT

**DATE:**

Thursday, August 10, 2017

**PREPARED BY:**

Shawn Scott

### LOGISTICS

Type	Contractor	Hrs or units
Protem Equipment	AGL	1

### Comments

#### Weather

Overcast, heavy rain at night

### Notes (production comments, incidents, other)

Safety meeting 715am.  
Stayed in camp to work on data for client, encountered more and more problems. Consulted with project manager (though he is in the field as well) and with technicians working for Geonics regarding a potential problem with the TEM47 transmitter.

## Goldstrike Geophysics GSR-17108-YT

**DATE:**

Saturday, August 12, 2017

**PREPARED BY:**

Shawn Scott

### LOGISTICS

Type	Contractor	Hrs or units
Protem Equipment	AGL	1

### Comments

#### Weather

Overcast, some sun.

### Notes (production comments, incidents, other)

Safety meeting 715am.  
Continued troubleshooting transmitter problems.  
Found issue in loop dampener dial, repaired broken resistor and performed tests on 18awg wire loop in camp. Had surther issues with a broken timing cable when the transmitter seemed to be not working at all. Repaired timing cable as well. Satelite phone dropped off by helicopter, on loan from the client.

## Goldstrike Geophysics GSR-17108-YT

**DATE:**

Monday, August 14, 2017

**PREPARED BY:**

Shawn Scott

### LOGISTICS

Type	Contractor	Hrs or units
Protem Equipment	AGL	1

### Comments

#### Weather

Light rain all day, heavy rain for the 5 minutes before helicopter pick up.

### Notes (production comments, incidents, other)

Safety meeting 715am.  
Finished EM on L3000. Had an issue with the receiver battery but swapped it for a fresh one. No further problems.

**Goldstrike Geophysics GSR-17108-YT**

<b>DATE:</b>	Tuesday, August 15, 2017
--------------	--------------------------

<b>PREPARED BY:</b>
Shawn Scott

<b>LOGISTICS</b>		
Type	Contractor	Hrs or units
Protem Equipment	AGL	1
IP Equipment	AGL	1

<b>Comments</b>
<b>Weather</b>
Mixed sun and cloud

<b>Notes (production comments, incidents, other)</b>
Safety meeting 715am.
Sent Protem gear to main camp via helicopter at 830am to be loaded and sent to expediter waiting in Mayo.
IP gear arrived on the same plane and was brought to Spit Lake camp at noon. Set out to the top of L1000 and set up to start surveying. Had some trouble getting a good current so tried multiple infinite locations, testing for the best connection. Took several test readings.
Back in camp 545p.

## Goldstrike Geophysics GSR-17108-YT

**DATE:**

Wednesday, August 16, 2017

**PREPARED BY:**

Shawn Scott

### LOGISTICS

Type	Contractor	Hrs or units
IP Equipment	AGL	1

### Comments

#### Weather

Frost in the morning, warm-ish by mid day.

### Notes (production comments, incidents, other)

Safety meeting 715am.  
Helicopter pickup at 730am.  
Found a good infinite location at the beginning of the day at station -50. Worked on Line 1000 for the rest of the day. Not always getting the greatest signal but no major issues.  
Back in camp at 545pm.

## Goldstrike Geophysics GSR-17108-YT

IP Equipment	AGL	1

<b>Comments</b>
<b>Weather</b>
Rain all day, sometimes just a drizzle but mostly rain.

<b>Notes (production comments, incidents, other)</b>
<p>Safety meeting 715am.</p> <p>Helicopter pickup at 730am.</p> <p>Finished surveying Line 2000 but did not have time to clean up any of the IP gear. Left current electrodes set up for possible SkyTEM interference test tomorrow.</p> <p>Back in camp at 545pm.</p>

## Goldstrike Geophysics GSR-17108-YT

**DATE:**

Thursday, August 24, 2017

**PREPARED BY:**

Shawn Scott

### LOGISTICS

Type	Contractor	Hrs or units
IP Equipment	AGL	1

### Comments

#### Weather

Overcast, low ceiling and fog.

### Notes (production comments, incidents, other)

Safety meeting 715am.  
Helicopter pickup at 750am.  
Shawn and Mike dropped at opposite ends of Line 2000 to clean up wire and transmitter while Jared and Hannah were set out on Line 3000 with a chainsaw to clear a pad where the generator and the cables could be dropped off by the helicopter. Fog closed in and the helicopter was unable to approach the southern part of the grid. Eventually it was decided that there would not be enough time to survey Line 3000 before packing up and leaving tomorrow so all gear was brought back to camp when the fog cleared at around 330pm.  
Everyone back in camp at 445pm.
