## **Introduction:**

**This report is to fulfill the requirement for renewal of my placer claim.**

**Over the previous summer I had ventured out to the claim on my days off and was able to test out various spots on the claim. I was successful in finding Gold, mainly fine colours, but also some small flakes and “nuggets” ( equal and less than 1mm in size so far )**

**A few days were also used to try the viability of using a White’s Gold Master metal detector, without much luck due to the high amount of “Hot Rocks” present.**

**As well I had a sample of sluice concentrate assayed by ALS Minerals to identify any other potentially valuable minerals, as well as Gold.**

**The results showed a somewhat high amount of Rare Earth Elements, and Thorium, which leads me to want to find if there might be a viable Monazonite placer deposit here.**

## Summary of Previous Investigations:

Reproduced from [www.miningyukon.com](http://www.miningyukon.com)

“The Wheaton River area first received attention in the early 1890s when prospectors discovered gold-bearing quartz-stibnite veins. With the completion of the White Pass and Yukon Route Railroad in 1903, the area became more accessible to prospecting and numerous other gold and silver occurrences were located between that year and 1906. Stibnite mineralization was discovered approximately 11 km east of Mount Skukum at Goddell Gully in 1909, and in 1922, gold-silver mineralization was discovered on the southeast side of Skukum Creek approximately 5.3 km southeast of Mount Skukum. Exploration activity slowed with the beginning of World War I and did not resume until the 1960s when activity increased and stibnite veins in the Goddell Gully, Becker-Cochrane, Wheaton River and Skukum Creek areas were re-examined.”

As well, my interest in the area came from hearing a story about Skookum Jim prospecting up the Wheaton river and coming back with a shotgun shell full of small nuggets. However I cannot find anything online to back that up, and I forget who told me the story now.

Otherwise, the area I'm working, does not have any other real historical record of placer mining, only hard rock mining (ie Mt Skukum, Tally Ho)

## **List of Claims**

**Only one claim:**

**Claim: JH01 Grant # P 50592**

**Claim Located/Recorded: 10 May, 2010**

**Whitehorse Mining District**

**Coordinates: Lat 135°11'00"W/Long 60°13'00"N**

**Length: 500 feet**

**Altitude: 2975 to 3000 feet Above Sea Level**

**Bearing from post 1 to Post 2: 217 Degrees True**

**Registered Owner: Bryce Wold, Whitehorse, Yukon**

**CERTIFICATE OF ANALYSIS WH10148338**

Method	CERTIFICATE COMMENTS
ME-MS41	Gold determinations by this method are semi-quantitative due to the small sample weight used (0.5g).

## **Results and Recommendations**

### **General**

Overall, my work this past summer resulted in finding gold in the gravel at various spots on the claim. Including in the creek bends, and on high and dry (bench) deposits and spring flood washes.

The claim is in a glaciated area with sparse overburden. The gravel is readily exposed, or covered in a foot or so of loess/overburden. The claim is overall in the Wheaton Valley, but it is being refreshed with gravel coming down Becker Creek, which itself washes an area of approx 70 sq Km of the eastern edge of the since collapsed Skukum Group Caldera.

### **Recommendations**

My recommendations for this year is to attempt to shaft or trench deeper down, to see how close a clay false bottom is to surface and the possibility for decent paying gravels near those false bottoms.

I believe bedrock is over a hundred feet down, and will not likely be reached by me at this time.

Overall I recommend continuing work on the claim.

## **Signed Statement of Qualifications**

**I, Bryce Wold, do not have any formal qualifications in regards to Geology.**

**However I have taken the basic prospecting course through the Yukon Chamber of Mines, and have studied geology on an amateur level.**

**That being said, I believe this report to be a fair assessment of my work done on the JH01 claim, on Becker Creek.**

**Bryce Wold**

**Whitehorse, Yukon**

**May 2, 2011**

## Statement of Expenditures

**Labour** ( 11 days, 4 hours a day, \$10/hr) = **\$440**

**Fuel to site** ( 11 trips, 15L return trip, Fuel \$1.05/L) = **\$173.25**

**Assay Costs** (ALS Minerals, Tests ME-MS41 & PGM-ICP27) = **\$94.24**

**Total Costs =** **\$707.49**

*Notes:*

*In total, over 1 Cubic yard of materials were moved.*

*Cost of labour is representative of work in lieu of paying someone else to perform said labour.*

*Cost of wear & tear on vehicle not reported, not sure how to calculate.*

**Bryce Wold**
